NEWS NOTE: One member wrote in asking how come the new Breyer P.O.A. had  
 spots on 1 side, but few if any on the other! Seems there was a minor  
 slip-up in the painting areas and these 5-spotted models were produced.  
 Now the models have been corrected, so the 5-spotted models are going to  
 become collector's items I'm told. Have you an unusual model that the  
 company goofed on? If so, let us hear about it. Someone found a Justin  
 Morgan with a star--over his ears. Another located an older Family Arab  
 mare in Appaloosa, with no spots on her rump. If you come across some  
 oddities, we collectors would like to know about them. Thanks, -gang. LW
