

HOWDY FROM OUT ARIZONA WAY! This month I've some information to share w/you about the unknown mold featured in the Sept. issue. Nancy Mongan writes she has several of the horses made

DO YOU  
KNOW THIS  
MODEL?

by the same company which she thinks is ARTMARK (not to be confused w/ Artline or other Art-- companies also from Japan). Any more info on Artmark? If so, write! Now can anyone identify the horse in the drawing? Sally Wells writes she got him at a flea market & it's about the size of a Traditional Breyer. They also came in mini size because I've one of

these, coming in a ranch set years ago. They are exceptionally skinny when viewed from above. Sally's was a kit of some kind. Marcia Jones, however, has one like it that wasn't a kit. Answers please? WRITE! (Ed. I've got about a dozen of the smaller ones, ranging in colors from a pale cream to white to sorrel to black! They were likewise in a ranch set but others came hitched to a small chariot. As for a make...that is an unknown to me. Can someone shed more light?) Thanks, write NOW.
